Aquaplast RT, kVue, Virtual Indexing, OneTouch, QUANTUM, DoseMax, Encompass, Integrated Shim, IntegraBite, Portrait, Direct Indexing, Variable Perf, Assure, AccuFix, Shoulder-Locs, PentaFix, Low-Pro, Tilt-Pro, Prone CSA Kit, ProBoard, ArmShuttle, ZiFix, ZiFix Traverse, SofTouch, Access, Access 360, Cosmas Cup, Aqua-Brief, INSIGHT, VacQfix, SingleStep, Qfix Gold, InkAlign, Alta, RapidHeat, Low-e, MR image & Treat, AirDrive, AirDrive Trolley, AirShuttle, Lithotomy AirShuttle, Slate AirShuttle, AirDrive Caddie, FlexLock, InfinityEdge, and InfinityLock are trademarks of Qfix.

MOLDCARE is a trademark of ALCARE CO, LTD. Varian, TrueBeam, Exact, Acuity, Ximatron, Calypso, HyperArc and Halcyon are trademarks of Varian Medical Systems. Lightspeed, HiSpeed, ProSpeed and Discovery are trademarks of GE Medical. Brilliance, AcQSim, Gemini Picker PQ 5000 are trademarks of Philips Medical Systems. SOMATOM, ZXT and TXT are trademarks of Siemens AG. MAGNETOM Aera, Skyra and Vida are trademarks of Siemens. Precise and Medical Intelligence I-Beam are trademarks of Elekta AB. Med-Tec, IPPS, and Med-Tec Prodigy are trademarks of Civco Medical Solutions. Kevlar and Tyvek are trademarks of E.I. DuPont de Nemours and Company. Sharpie is a trademark of Sanford L.P. DecoColor is a trademark of Uchida of America, Corp. Pro-Tekt is a trademark of MEDRAD, INC. U.S.A. Formica is a trademark of the Formica Corporation. Suremark, Clearline, PortalMark, Visionmark, Powermark, Liquimark, and BeautyLine are registered trademarks of The Suremark Company. ShadowForm is a trademark of IZI Medical Products. Staph-Chek is a registered trademark of Morrison Medical. Bolx I and Bolx II are registered trademarks of Action Products. RectalPro is a trademark of QLRAD. SpringLoc is a trademark of SchureMed. FCT Embrace is a registered trademark of Fujifilm Medical Systems USA, Inc.

The following products or their accessories or components are patented or patent(s) pending in the US and/or elsewhere by Qfix or licensed by Qfix. This list may not be all inclusive. Encompass, SRS Adapter, SRS Cushion Support, AirDrive Trolley, AirShuttle Devices, AirDrive Caddie, ZiFix, ZiFix Traverse, kVue Access 360 G2, Virtual Indexing, Integrated Shim, kVue, DoseMax, AccuFix, IntegraBite, Encompass 15-Channel Head Coil, and FlexLock.

This catalog contains information about products which may or may not be available in particular countries. Each country has specific laws and regulations governing the commercialization of medical devices and the communication of information regarding medical devices in printed and digital media. Products appearing in this catalog or on our website may or may not have received approval, clearance, or marketing authorization by a governmental regulatory body in any particular country, or may have received approval, clearance, or marketing authorization for different indications and restrictions in different countries, or may be for investigational use only. A product's appearance in this catalog should not be construed as a solicitation or promotion for said product, nor any indication which is not authorized by the laws and regulations of the country where the reader resides.

About Qfix:

With over 45 years of experience, Qfix offers a complete line of positioning solutions for radiotherapy. Patient comfort and improved outcomes with streamlined workflows are of the utmost importance in all our products. We make it our business to listen closely to the needs of medical professionals and, together, we advance precise therapist friendly and patient friendly positioning solutions for cancer treatment around the world.

Qfix offers a wide product portfolio to fit all patient positioning needs and immobilization options. We specialize in devices that provide a unique combination of rigidity and ultra-low attenuation. We also have a full offering of proton therapy and MR compatible devices for simulation and treatment. As an organization, we take pride in our innovative approach to discovering, developing, and commercializing technology-driven solutions for radiation therapy.

We continue to seek ways to support the centers we work with daily. A few examples include offering new product developments, hosting virtual trainings from our Education Center, and providing access to knowledgeable sales managers who can provide on-site consultation. Our goal is always to provide the best patient positioning systems to our clinical partners so that we can help them serve and care for their patients in the most effective way. We hope you'll join us in this mission.

Sincerely,

Damon Kirk
President

International Customers: Please contact Qfix to confirm product availability for your market.

**CUSTOMIZABLE
LEARNING OPPORTUNITY**

**SIMULATING THE
CLINICAL ENVIRONMENT**

Fix[®] EDUCATION CENTER

The Qfix Education Center allows us to provide **uninterrupted support** to our clinical partners around the world. It is designed to simulate a clinical environment and facilitate virtual demonstrations.

One of the great benefits of an **interactive web-based session** is that we can showcase a variety of customizable positioning solutions and treatment options. It helps us **understand your current workflow** so that we can focus on the techniques that work best for you.

We are excited to offer a **live learning resource** to demonstrate our radiation therapy solutions.

kVue Couch Tops & CT Overlays

kVue The Best of Both Worlds

From Simulation & Planning to Treatment

AAPM TG176 – The kVue CT Overlay accepts the same inserts as the kVue Couch Top. By using the same couch top inserts from simulation through treatment, identical dosimetric properties can be achieved. This provides the potential for **more accurate dose planning and delivery**.

OneTouch™ Latch

Designed and rigorously tested for precision attachment to a variety of kVue inserts. It allows secure attachment and quick detachment with kVue inserts.

Validated with kVue inserts.

Virtual Indexing™

An array of white fiducial markers is placed down the center of the couch. The markers are located in line with the center of each indexing notch. A second array of fiducial markers are offset laterally to designate the superior or inferior location of the markers in relation to the indexing origin. This makes it easy to identify the indexing location on your image.

- Quickly ensures treatment couch is in the same position as the simulation couch – every time
- Enables more accurate and faster workflows
- Virtual Indexing is available on most couch tops, CT overlays, and many devices

Works with most X-ray techniques such as cone beam CT

Canon (formerly Toshiba)

RT-4550KVTAQ	kVue CT Overlay for Canon Aquilion CT Scanner (for 2150 mm long cradle)
RT-4550KVTAQ2	kVue CT Overlay for Canon Aquilion Scanner (for 2440 mm long cradle)

GE

RT-4550KVGEL	kVue CT Overlay for GE LightSpeed and HiSpeed CTi CT Scanners (for 2310 mm long cradle)
RT-4550KVGER	kVue CT Overlay for GE LightSpeed RT CT Scanner (for 2070 mm long cradle)
RT-4550KVGEC	kVue CT Overlay for GE LightSpeed VCT Scanner (for 2620 mm long cradle)

Philips

RT-4550KVPH01	kVue CT Overlay for Philips Spectral CT 7500 (for 2450 mm long cradle)
RT-4550KVPBR	kVue CT Overlay for Philips Brilliance CT Scanner (for 2500 mm long cradle)
RT-4550KVPBRPM	kVue CT Overlay for Phantom Holder for Philips

Siemens

RT-4550KVSS1	kVue CT Overlay for Siemens SOMATOM Plus 4, SOMATOM Volume Zoom/Access & Sensation Hand Scanners (2440 mm long cradles)
RT-4550KVSS2	kVue CT Overlay for Siemens SOMATOM Balance, Emotion or Espirit Cradles (2170 mm long cradles)
RT-4550KVSS3	kVue CT Overlay for Siemens SOMATOM Confidence, SOMATOM Drive and SOMATOM Edge Plus (MPT, MPT2n or Vario 2 Table)
RT-4550KVSS4	kVue CT Overlay for Siemens PHS1B or Vario RT Table
RT-4550KVSS5	kVue CT Overlay for Siemens Biograph
RT-4550KVSSPM	kVue CT Overlay for Phantom Holder for Siemens

kVue One Couch Top

OneTouch Latch

RT-4551KV-01
kVue One Couch Top
(without moving rails)

kVue One Couch Top (shown with RT-4551KV19
kVue Low-e Insert)

- Inserts mount directly to the couch top through the OneTouch Latch
- One-piece low attenuation modular design with a homogeneous composite base
- No moving rails for ease of treatment planning and imaging
- Easily adapts to patient and treatment specific needs through the use of interchangeable kVue Inserts
- Compatible with many 4 & 6 Degrees of Freedom (DOF) linear accelerators and robotic bases

RT-4551KV-01 kVue One Couch Top Base Frame (Back Panel included. Requires an insert to function.)

kVue Couch Top

RT-4551KV
kVue Couch Top
(with moving rails)

kVue Couch Top (shown with RT-4551KV18
kVue DoseMax Insert)

- Easily adapts to patient and treatment specific needs through the use of interchangeable kVue Inserts
- Inserts mount directly to the couch top through the OneTouch Latch
- Moving rails can be moved laterally and independently according to treatment plan and imaging requirements

RT-4551KV	kVue IGRT Couch Top Base Frame (requires an insert to function)
RT-4551KV0	kVue Indexing Back Panel with Varian Exact compatible indexing (not pictured)
RT-4551KVA-ELK	Interface plate for Elekta, required for Elekta Couch installations (not pictured)
RT-4551KVVHRD	Hardware Kit for Varian Exact Couch, required for Varian Exact installations
RT-4551KVTBHRD	Hardware Kit for Varian TrueBeam Pedestal

kVue Low-e Insert

Low_e[™]

Shown with kVue SBRT Bridges RT-4558-B1 (small), RT-4558-B2 (large), and Low Profile Compression Paddle RT-4558KV4-01 (low profile) See page 43 for more information

RT-4551KV19
kVue Low-e Insert

A low electron generating, homogeneous insert for enhanced imaging and treatment. It is the optimal choice for a wide range of radiotherapy treatments.

SPECIFICATIONS:

RT-4551KV19	kVue Low-e Insert (Includes Calypso Compatible Locating Bar)
--------------------	--

Length	1325 mm
Water Equivalence	4.2 mm @ 6 MV
Weight Limit	249 kg (550 lb) Uniformly Distributed Load

kVue DoseMax Insert

DoseMax[™]

Shown with kVue SBRT Bridges RT-4558-B1 (small), RT-4558-B2 (large) See page 43 for more information

RT-4551KV18
kVue DoseMax Insert

Low electron generating insert combines the rigidity of a solid panel insert with skin-sparing properties comparable to a grid panel insert.

SPECIFICATIONS:

RT-4551KV18	kVue DoseMax Insert (Includes Locating Bar)
RT-4551KV5F	Replacement Film Skin for kVue DoseMax Insert - 3 pack

Length	1325 mm
Water Equivalence	2.0 mm @ 6 MV
Weight Limit	249 kg (550 lb) Uniformly Distributed Load

kVue Universal Tip Insert

RT-4551KV8
kVue Universal Tip Insert

Allows mounting of quality assurance and treatment devices and provides universal mounting capability for some Varian Exact® style tip accessories.

RT-4551KV8 kVue Universal Tip Insert (Includes Locating Bar)

kVue Short Insert

RT-4551KV2
kVue Short Insert

Pictured Portrait Intracranial Head & Neck Device (RT-4552) mounted to kVue Short Insert.

A shorter flat panel insert that allows the kVue to be retracted so that extended head and neck devices can be placed at isocenter.

RT-4551KV2 kVue Short Insert (Includes Locating Bar)

kVue Standard Insert 1610 mm

RT-4551KV13
kVue Standard Insert (1610 mm)

A versatile, homogeneous insert for enhanced imaging and treatment. It is the optimal choice for a wide range of radiotherapy treatments.

RT-4551KV13 kVue Standard Insert 1610 mm (Includes Locating Bar)

kVue Encompass SRS Insert

The most advanced SRS immobilization solution with Integrated Shim System

RT-4600KV-01
kVue Encompass SRS Insert

Includes Encompass Headrest E0

Includes Hand Grip Array

A highly specialized, non-invasive immobilization solution for stereotactic radiosurgery. Encompass is validated for use with Varian HyperArc. See page 50 for more information.

Encompass SRS Fibreplast System

Fibreplast Variable Perf Open View Mask

Posterior Thermoplastic

IntegraBite Applicator

IntegraBite Biteplate

Includes:

- Fibreplast Variable Perf Open View Mask
- Posterior Thermoplastic
- Optional IntegraBite

RT-4600KV-01	kVue Encompass SRS Insert (includes Encompass Headrest E0 and Hand Grip Array)
RT-B889KYCF2	Encompass SRS Fibreplast System (includes Fibreplast Variable Perf Open View Mask, Posterior Thermoplastic and optional IntegraBite)

Portrait™

kVue Portrait Intracranial, Head & Neck Insert

RT-4552KV
kVue Portrait Insert

RT-4552KV-01
kVue Portrait Proton Insert
See Page 128

Provides superior immobilization for a variety of brain and head and neck radiotherapy treatments.

RT-4552KV SPECIFICATIONS:

Length	1328 mm
Water Equivalence	6.0 mm @ 6 MV
Weight Limit	249 kg (550 lb) Uniformly Distributed Load

RT-4552KV kVue Portrait Intracranial, Head & Neck Insert (Includes Locating Bar)

ACCUFIX™

kVue AccuFix Head & Neck Insert

RT-4525KVL
kVue AccuFix Head & Neck Insert

Designed to immobilize the head, neck and shoulder regions. It is intended to provide optimum localization in the supine and prone positions.

SPECIFICATIONS:

Length	1368 mm
Weight Limit	249 kg (550 lb) Uniformly Distributed Load

RT-4525KVL kVue AccuFix Head & Neck Insert (Includes Locating Bar)

kVue BoS Inserts

Length: 1320 mm

RT-4535KV
*kVue BoS Insert
(standard length)*

Specifically designed to meet the unique requirements of proton therapy for patient immobilization and beam transmission. It is engineered to rigidly support the patient without using a flat base that blocks the use of proton beam angles.

The conformal shape is designed to minimize the distance between the patient and the field defining aperture, optimizing the proton beam penumbra.

RT-4535KV SPECIFICATIONS:

Length	1325 mm
Water Equivalence	5.2 mm @ 6 MV
Weight Limit	159 kg (350 lb) Uniformly Distributed Load

Length: 1210 mm

RT-4535KV01
*kVue BoS Insert
(shorter length)*

Shorter length kVue BoS Insert is required to treat vertex fields in some robotic couch setups.

Length: 1580 mm

RT-4535KV03
*kVue BoS Insert
(longer length)*

Longer length kVue BoS Insert is required to treat lower spinal fields on tall patients.

kVue Access 360 G2 Prone Breast Insert with Expanded Supraclavicular Access

Near 360 degree treatment access

RT-4544KV-10

Only available as a complete package

Designed to allow breast cancer treatment for both left and right breast, including whole breast, partial breast and accelerated breast treatments. The sleek, cantilevered design provides both oblique and non-coplanar access, potentially enabling higher dose per fraction. Since the beam path is primarily through the breast with minimal couch top interference, artifacts and scattering may be minimized.

Expanded Supraclavicular Access

The thinner, wider grid window provides full access to treat the supraclavicular nodes. The supraclavicular access allows patient treatment to be accomplished in one setup if desired.

kVue Access 360 G2 Package Includes:

Prone Headrest

Contour Headrest

Left & Right Inserts included in Package

Storage Cart

CT risers and CT shims

2 Hand Grip Posts

Dual Hand Grip

Locating Bars

RT-4551BAR

Locating Bar

Has two pins that are used on treatment couch tops to index standalone positioning and immobilization accessories.

RT-4551BAR-01

Sliding Locating Bar

The two indexing pins can be offset by 100 mm either left or right for increased flexibility of positioning an immobilization device and accessory setup, which is ideal for breast and SBRT treatment setups. They are compatible with CT Overlays and treatment couch tops with Varian® Style Indexing.

RT-4551BAR-02

Calypso Compatible Locating Bar

Made from non-conductive materials and is designed to index Calypso OK compatible accessories to Calypso compatible couch tops with Varian Style Indexing.

RT-4551BAR-03

QA Locating Bar

Compatible with Varian Geometric Phantom.

RT-4551BAR-04

Elekta Style Locating Bar

Locating bar for Elekta style indexed couch tops.

RT-4551BRI

MR Safe Locating Bar

MR Safe, two pin locating bars are used on MR tables and treatment couch tops to index standalone positioning and immobilization accessories.

RT-4551BAR-05

Locking Locating Bar

Compatible with Varian Exact Style Indexing.

kVue Insert Docking Plate

RT-4550KVQ

kVue Insert Docking Plate

Provides greater flexibility for standardizing the use of kVue Inserts in multiple modalities. kVue Inserts can now be securely indexed to a wider variety of CT scanner and treatment couch tops through the use of this docking plate and two pin locating bars.

Qfix Couch Top Service Panel

RT-4551SRV

This product is transparent.

Mounts on any kVue Couch Top or couch top with Varian Style Indexing to protect the couch top surface during service or maintenance.

SofTouch Couch Top Pads

Supportive and comfortable for patients during a variety of radiotherapy procedures. They are available in multiple lengths and thicknesses.

RT-4488-04
SofTouch Couch Top Pad
19 mm x 500 mm x 1800 mm

RT-4488-03
SofTouch Couch Top Pad
6 mm x 500 mm x 1800 mm

RT-4488-02
SofTouch Couch Top Pad
19 mm x 500 mm x 1000 mm

RT-4488-01
SofTouch Couch Top Pad
6 mm x 500 mm x 1000 mm

Detail of pad thickness

RT-4488-01	SofTouch Couch Top Pad, 6 mm x 500 mm x 1000 mm
RT-4488-02	SofTouch Couch Top Pad, 19 mm x 500 mm x 1000 mm
RT-4488-03	SofTouch Couch Top Pad, 6 mm x 500 mm x 1800 mm
RT-4488-04	SofTouch Couch Top Pad, 19 mm x 500 mm x 1800 mm

SofTouch Couch Top Pads have a 90-day warranty from date of purchase. Foam products will vary in size due to manufacturing, storage, and use conditions. They are intended for patient comfort purposes only. Dimensions are for reference only.

QUANTUM™ CT Overlays

Create a flat, indexed surface ready for RT simulation. They are thin and lightweight, varying from 7 - 15 kg (15 - 33 lbs) depending on the model. Varian Exact Indexing comes standard.

At just 514 mm (20.25 in) wide and 16 mm (5/8 in) thick, the QUANTUM CT Overlay is both narrower and thinner than most other indexed CT overlays. This ultra thin profile increases the usable bore space.

**Improved
Field of View**

Increased usable bore space.

QUANTUM CT Overlays are available for a wide variety of CT scanner makes and models

The overlay's carbon fiber skin and foam core construction create a homogeneous radiolucent platform with minimal artifacts, even at Varian Exact® Compatible Indexing edges.

Canon (formerly Toshiba)

RT-4550CN01	Quantum CT Overlay - Canon Cartesion CT Cradle (for 2780 mm long cradle)

Quickly Adapts to a Variety of Clinical Treatments

Alta is an all-in-one solution that quickly adapts to a wide range of setups, reducing setup times.

- Combines functionality of multiple devices
- Dependable and reproducible
- Fast and efficient setups
- Can be extended beyond end of couch top for improved head and neck dosimetry
- Lightweight – 5.4 kg (12 lbs)
- CT, MRI, and treatment compatible

Alta on Halcyon™

Elevate Your Workflow

Alta Standard Package

RT-4800-100

Alta Multipurpose Device

InfinityEdge™ & InfinityLock™

InfinityLock accessories tightly fasten to the device and can be infinitely indexed along the InfinityEdge of the device.

Alta™ ArmShuttle™ Elite

Quickly and securely attaches to provide comfortable, reproducible positioning of the arms out of the treatment field.

Stereotactic Radiosurgery (SRS)

Alta can easily be used as a stereotactic radiosurgery treatment solution through the quick attachment of the SRS Adapter. The SRS Adapter reduces motion, allowing the dose to the tumor to be maximized, while minimizing radiation to the surrounding healthy tissue for high-precision immobilization with submillimetric accuracy.

Intracranial, Head and Neck

Alta can extend beyond the couch top to provide improved access to the head and neck region. It is compatible with S-frame thermoplastic masks, which can be directly attached to the device. A Silverman Adapter Plate enables the use of Silverman headrests to support the cervical spine during simulation and treatment. This setup provides high-precision positioning and reproducibility for head and neck applications.

Thermoplastic Masks (see pages 168-171 for more Thermoplastic options)

Craniospinal

Alta provides a homogeneously constructed spinal section for improved radiotherapy treatments. A Silverman Adapter plate enables the use of Silverman headrests to support the cervical spine during simulation and treatment. The central spine of the device is free and clear of obstructions, which makes it a reliable setup for craniospinal applications.

Stereotactic Body Radiation Therapy (SBRT)

The low electron generating properties of Alta make it a great solution for stereotactic body radiation therapy (SBRT) setups. It is compatible with a variety of accessories to immobilize the patient, such as our 2 and 3-chamber VacQfix cushions and Alta ArmShuttle Elite. It can be adapted to apply abdominal compression when used with devices such as ZiFix, ZiFix Traverse, InfinityLock Compression Bridges and paddles. This setup is customizable for a wide range of patient anatomies while also ensuring patient comfort.

Low Profile Compression Paddle

RT-4558KV4

Compression Paddle

Lung

Alta allows immobilization for lung treatment when used with abdominal compression devices such as the ZiFix, ZiFix Traverse, or InfinityLock Compression Bridges. This setup provides internal motion management (especially of structures surrounding the diaphragm in the lower thoracic and upper abdominal cavity, such as lower lobes of the lungs and liver) through the induction of shallow breathing.

VacQfix Cushions

Contoured positioning that custom forms to a specific patient for enhanced comfort and accuracy.

ZiFIX TRAVERSE™

ZiFix Traverse is designed to reliably index and maintain pressure to suppress tumor and organ motion for imaging and radiotherapy treatments.

Benefits:

- Low profile compression for use with most imaging and treatment systems
- Immobilizes patient during imaging and treatment
- Minimizes potential for collisions and interference when compared to compression bridge

Fiducial markers aid in consistent patient setup relative to patient anatomy

Bladder is designed to be durable up to 250 mmHg, a 2x factor of safety

Features InfinityLock to quickly and securely attach to compatible Qfix devices

Compression Paddle

Low electron generating, homogeneous insert for enhanced imaging and treatment. It can be used in conjunction with the radiolucent kVue Compression Bridges for stereotactic body radiotherapy (SBRT) treatments, improving workflow efficiencies and eliminating the need for a separate SBRT device. See page 43 for Low-e accessories.

Features:

- Used for a wide range of patient treatment setup
- Low water equivalence

SPECIFICATIONS:

Length	1325 mm
Water Equivalence	4.2 mm @ 6 MV
Weight Limit	249 kg (550 lb) Uniformly Distributed Load

DoseMax[™]

RT-4551KV18

Abdominal/Thoracic Motion Control System

ZiFix is an abdominal/thoracic motion control system that wraps around the patient to provide abdominal compression. It induces shallow breathing, reducing organ motion caused by respiration.

Benefits:

- Compatible with CT and MRI environments up to 3T
- Suppresses motion of lungs and liver for imaging and radiotherapy
- Provides positional consistency between imaging, simulation, and treatment
- Can be used as a standalone unit or with other SBRT products
- Couch Top Independent

Encompass™

Encompass SRS Immobilization System

Highly rigid, non-invasive immobilization device designed for precisely targeted treatment to the brain, head & neck.

Clinical Advantages:

- Immobilization for treatment of multiple lesions with a single isocenter
- High-precision immobilization with submillimetric accuracy for stereotactic radiosurgery, including trigeminal neuralgia
- Integrated Shim System optimizes workflow efficiencies
- Open view thermoplastic can reduce patient anxiety and allows for intra-fraction positioning verification utilizing optical tracking systems
- Submillimetric immobilization with or without optional IntegraBite

Stereotactic Radiosurgery (SRS)

Integrated Shim™ System

Integrated Shim System

Innovative Integrated Shim allows independent height adjustment at each pin, providing completely customizable immobilization. Each Integrated Shim can be adjusted in discrete 0.5 mm increments, with a total range of 4 mm.

- Adjusting shim height is as easy as simply rotating the pin
- Eliminates the need for mask removal to adjust shim height
- Better workflow and instant setup feedback

Encompass SRS Fibreplast Masks

Made from the most rigid thermoplastic material available, providing anterior and posterior cranial support.

- Fibreplast is 50% more rigid than standard thermoplastics
- Variable Perf pattern maximizes rigidity while minimizing the bolus effect

ENCOMPASS SRS FIBREPLAST SYSTEM

Fibreplast Variable Perf Open View Mask

Posterior Thermoplastic

- Repeatable positioning
- Simple, streamlined design makes application and insertion easy

SRS Adapter for Portrait & S-Type Devices

Flexibility to Perform SRS Treatments with Portrait & S-Type Devices

Non-invasive solution that enables submillimetric positioning for stereotactic radiosurgery treatments on the Portrait Intracranial Head & Neck Devices and other S-type devices. The system reduces motion, allowing for maximum dose to the tumor while minimizing radiation delivered to the surrounding healthy tissue.

Clinical Advantages:

- Enables single isocenter SRS treatment for multiple lesions when used in conjunction with Encompass SRS Fibreplast Masks
- Accommodates a variety of SRS headrests and cushion supports for a fully customizable setup
- Easy to set up and can help to minimize procedure time and cost

Portrait with Integrated Shim

Portrait™

Integrated Shim™ System

Innovative Integrated Shim allows independent height adjustment at each pin, providing completely customizable immobilization. Each Integrated Shim can be adjusted in discrete 0.5 mm increments, with a total range of 4 mm.

Key Features:

- Independent shimming at each pin point
- No need to remove mask to tighten or loosen
- Increased workflow efficiencies
- Increased patient comfort
- Better workflow and instant setup feedback

To adjust shim height:

- Pull up to unlock
- Rotate to the desired height adjustment
- Depress to lock

IntegraBite™

Key Features:

- Decrease head and neck rotation, flexion, and extension
- Repeatable positioning
- Simple, streamlined design makes application and insertion easy

Intracranial, Head & Neck

Portrait™

Intracranial, Head & Neck

Provides superior immobilization for a variety of brain and head & neck radiotherapy treatments.

Features:

- Easy to use
- Lightweight
- Daily reproducibility
- Uses S-frame thermoplastics

Portrait devices and masks provide a high level of stability by limiting patient motion and reducing the probability of positioning errors.

Devices index to the couch top with either a two-pin Locating Bar or a Direct Indexing™ Adapter. The Portrait can be extended beyond the end of the couch top making it ideal for full 360-degree treatments.

Portrait accommodates supine and prone setups for patient specific treatments. Portrait is rigid while providing minimal attenuation.

Portrait™

Portrait Series

The Portrait S-frame series of masks is compatible with the Portrait device and other S-frame devices. These masks come in a variety of different options allowing for shoulder immobilization, accommodation of long hair, and decreased anxiety. They are available in Aquaplast RT and Fibreplast material in 2.4 mm and 3.2 mm thicknesses.

Frame Styles:

Head Only

The Head Only masks are perfect for everything from whole brain to complex IMRT treatments.

Split-frames

Split-frames reduce the stretching required of the thermoplastic, thus forming a more rigid mask. These masks also accommodate patients with long hair.

Head & Shoulder

The Head & Shoulder masks extend below the patient's shoulders, providing additional immobilization.

Key Features:

Assure Open View

Reduces patient anxiety while allowing real time patient monitoring using optical tracking systems.

Open Eye Open Mouth

Eye openings help reduce anxiety while capturing bridge of nose. Mouth opening allows for tongue displacement and free breathing.

Variable Perf Pattern

This perforation pattern maximizes rigidity while minimizing the bolus effect.

U-frames

The U-frame series of masks is compatible with the AccuFix Device and other U-frame devices. These masks come in a variety of options allowing for different patient head sizes, accommodating long hair, and decreasing anxiety. They are available in Aquaplast RT and Fibreplast material in 2.4 mm, 3.2 mm, and 4.8 mm thickness.

Frame Style:

Traditional U-frames

Traditional U-frame masks are available in Head Only to provide a variety of patient positioning and immobilization solutions. These masks are especially useful for patients with smaller heads.

Slimline U-frames

Slimline U-frame masks feature a thin frame that maximizes the usable area of the thermoplastic material. These masks are especially useful for patients with larger heads.

Split U-frames

Split-frames reduce the stretching required of the thermoplastic, thus forming a more rigid mask. These masks also accommodate patients that have long hair.

Key Features:

Assure Open View

Reduces patient anxiety while allowing real time patient monitoring using optical tracking systems.

Open Eye Open Mouth

Eye openings help reduce anxiety while capturing bridge of nose. Mouth opening allows for tongue displacement and free breathing.

Variable Perf Pattern

The perforation pattern maximizes rigidity while minimizing the bolus effect.

Tilt-Pro™ Tilting Base

with S-frame Compatibility

RT-4525TILT
Tilt-Pro Tilting Base with
Low-Pro Swivel Locks

Allows precise angling of the head in both prone and supine treatments to avoid critical structures. The Tilt-Pro adapts easily to most treatment couch tops, simulator, and CT tables. It is designed for one-step molding, positioning, and indexing of Aquaplast RT and Fibreplast U-frame and S-frame masks.

Indexable channel arms allow adjustments from 0 to 30 degrees, in 5-degree increments. Tilt-Pro utilizes Silverman Head Supports, and MOLDCARE® Head Cushions to provide effective, comfortable and reproducible head support.

Key Features:

- Tilt-Pro Tilting Base is completely non-metallic, maximizing treatment options.
- Utilizes S-frame and U-frame thermoplastic masks for greater treatment options.
- The ProBoard Flat Carbon Fiber Headboard is also available. See page 69.

Intracranial, Head & Neck

The Hand Grip Array can be used on Encompass, Portrait, BoS, and AccuFix devices.

Push-Pin Style 3-Point & 5-Point Masks

These masks allow for 3-point and 5-point immobilization utilizing a simple push pin design integrated into the masks. These masks are also available as reloadable inserts without a frame. They are available in Aquaplast RT and Fibreplast material, each with a nose hole for free breathing.

Frame Style:

Disposable

The 3-point (head and neck) and 5-point (head & shoulders) disposable PentaFix™ masks provide immobilization with a built-in frame.

Reloadable

The reloadable masks provide an economical and eco-friendly option by using a reusable frame.

Key Features:

Assure Open View

Reduces patient anxiety while allowing real time patient monitoring using optical tracking systems.

3-Point Masks with Disposable Lockers

RT-1782PR5	Aquaplast RT 5-Point Mask, 2.4 mm, Standard Perf
RT-1778PR5	Aquaplast RT 5-Point Mask, 2.4 mm, Micro Perf

3-Point & 5-Point L-Profile Masks

These masks allow for 3-point and 5-point immobilization utilizing a L-Profile design which locks into the device via the L design. They are available in Aquaplast RT and Fibreplast material in 2.4 mm and 3.2 mm thicknesses.

Frame Style:

Head & Neck

The 3-point masks are ideal for everything from whole brain to complex IMRT treatments.

Head & Shoulder

The 4-point and 5-point masks extend below the patient's shoulder, providing additional immobilization.

Key Features:

Assure Open View

Reduces patient anxiety while allowing real time patient monitoring using optical tracking systems.

RT-4491-Q3-2G
Silverman Q3

RT-4491-Q4-2G
Silverman Q4

Low-Profile Silverman Head Support

For the Silverman 'M' and 'M2', the exclusive low-profile design allows the occiput to rest below the top plane of the board. By lowering the patient's head, the mask is stretched a shorter distance during the molding process. Less stretch means a more comfortable mask and an overall better fit for the patient.

RT-4491R-M
Silverman 'M'

RT-4491R-M2
Silverman 'M2'

MOLDCARE® Cushions

Customizable for patient comfort and positioning accuracy. Composed of a soft fabric outer shell containing low density foam beads coated in a moisture-cured resin. When activated with water, the cushion becomes rigid, conforming to the patient. It can be used alone or with a Silverman Head Support.

More details on page 80*

Foam Bottom Stopper Included.

*Built-In Ladder System Included.
Accessory Ladder Set Sold Separately.*

Indexing Scale on device

Lightweight, one-piece design. The built-in angulation ladder system quickly and securely indexes patients at 0°, 5°, 7.5°, 10°, 12.5°, and 15° angles. Additional ladder angles, 20° & 25°, are sold separately. The foam bottom stopper and tailbone pad ensure maximum patient comfort and fixed reproducible setups. Breast & Lung versions allow treatment for both applications in one device.

Features:

- Lightweight
- High-density foam bottom stopper indexes into eight positions for reproducible setup
- Tailbone pad ensures patient comfort and can be removed for cleaning
- Robust angulation ladder system for variable treatment angles
- Device can be offset laterally to position the breast toward isocenter
- Optional Arm and Wrist Supports have memory foam pads for increased patient comfort and are removable for easy cleaning (sold separately)
- Indexing scale – when used with the lateral tattoo, therapists can confirm the correct patient setup each day before treatment.

Access Supine Breast & Lung

kVue Access 360 G2 Prone Breast Insert

**Near 360 degree
treatment access**

RT-4544KV-10

*Only available as a
complete package*

Designed for both left and right breast cancer treatment including whole breast, partial breast, and accelerated breast treatments. The sleek, cantilever design provides both oblique and non-coplanar access. Since the beam path is primarily through the breast with minimal couch top interference, artifacts and scattering may be minimized.

Expanded Supraclavicular Access

The thinner, wider grid window provides full access to treat the supraclavicular nodes. The supraclavicular access allows patient treatment to be accomplished in one setup.

and Shims)

Features & Benefits of kVue Access 360 G2

CT Simulation

- 130 mm CT risers index to existing overlays with 2-pin locating bars
- 25 mm CT shims attach to the CT risers to raise the insert
- Rigid, lightweight CT risers are coated for easy cleaning

Alignment

- Virtual Indexing provides confirmation of patient alignment
- Ipsilateral scale provides an additional point of reference for laser alignment
- Knee alignment marks aid in patient positioning for daily setup

Supraclavicular Access

- Thin, wide-grid window provides full access for treatment of the supraclavicular nodes. (Exclusively available on the Access 360 G2)
- Treatment of breast and supraclavicular nodes can be accomplished in one setup

Open Access Treatment

- Breast cutout offers ability to treat with non-coplanar and oblique angles

Additional Attributes

- Inverted wing design flattens the back to position breast tissue away from chest wall and torso
- Ergonomic Dual Hand Grip relieves stress on patient's wrist
- Hand Grip Posts provide a hand hold for patients with limited mobility
- Prone headrest design allows free breathing while lateral light slots promote an open feeling for claustrophobic or anxious patients
- Contour headrest allows the patient's head to be rotated to either side

Qfix Carbon Fiber Pelvis System

Uses the widely popular leg wedge technique for easy and accurate pelvis target repositioning. This system flattens the lower lumbar for added comfort and repeatability. It is used with Opti-Handles to secure a wide variety of different shapes and sizes of Aquaplast RT.

It includes a Groin Lock Key to secure the Aquaplast RT between the patient's legs, and a left and right millimeter scale for easy reference for repositioning.

- Reloadable Opti-Handles secure a variety of shapes and sizes of Aquaplast RT.
- Aquaplast RT available for Qfix Carbon Fiber Pelvis System.

*Qfix Carbon Fiber
Pelvis System*

The Qfix Carbon Fiber Pelvis System is used with Opti-Handles to secure a wide variety of different shapes and sizes of thermoplastics.

RT-4454
Opti-Handles, 300 mm, set of 2

RT-4458
Opti-Handles, 450 mm, set of 2

Aquaplast RT™ Aqua-Brief™

The pelvis thermoplastic series is compatible with the Qfix Carbon Fiber Pelvis System and the Alta Multipurpose device. These thermoplastics allow for the immobilization of the pelvis region. The system flattens the lower lumbar for added comfort and repeatability. Aquaplast RT is available in 2.4 mm and 3.2 mm thickness.

The Aqua-Brief technique uses a sheet of Aquaplast RT and a three-point fixation system covering the pelvis region and not the abdomen. The Groin Lock Key provides a secure, indexable patient fixation.

Pelvis Thermoplastics

For use with Alta Multipurpose Device & Qfix Carbon Fiber Pelvis System

300 mm Opti-Handles

RectalPro™ 75

Endorectal Balloon (ERB)

RT-4415RP-50
RectalPro 75 Prostate
Endorectal Balloon (ERB)

The curved shaft design promotes patient comfort. Air/water fill volume is variable to meet clinical needs and allows for reproducible balloon positioning. Overall, limits prostate movement while the beam is on and allows reproducible positioning.

Features:

- Reduces ano-rectal toxicity
- Increases gland stability
- Improved daily reproducibility
- Promotes rectal wall and sphincter sparing
- Reduces intra-fraction prostate motion

Insert the ERB tip towards the table/couch and follow the anatomical curve of the colon

ERB inserted

Slowly inflate with air/water 60-100 ml with physician's directions

After inflation, pull down the ERB and affix the stopper

RT-4415RP-50 RectalPro 75 Endorectal Balloon (Quantity 50 with 100 ml Syringe)

SofTouch Elite Bellyboard

15 mm headrest

The Bellyboard system comes with a prone headrest that can be indexed in multiple locations

RT-4464-02

SofTouch Elite Bellyboard

Includes Wall Hook for Mounting Bellyboard (fasteners not included)

30 mm headrest

50 mm belly cushion

30 mm caudal cushion

80 mm groin cushion

Adjustable stabilization platform designed to position the lower bowel away from the treatment field during prostate radiotherapy. The removable caudal cushion and separate belly support cushions allow for custom patient setup. The SofTouch Elite Bellyboard's unique semi-firm radiolucent foam provides repeatable positioning and is contoured to relieve pressure point stress and improve patient comfort. Multiple cushion configurations provide optimal anatomical placement of both external and internal anatomy for improved clinical outcomes.

Features:

- Three contoured and adjustable headrests allow for improved patient comfort
- Provides multiple indexing locations to ensure precise, repeatable positioning
- Ergonomic hand grip relieves stress on patient's wrists
- Removable cushions allow for custom patient setup
- Contoured to relieve pressure point stress
- Scales to aid in laser alignment
- Includes wall hook for convenient storage solution
- Lightweight
- Easy to clean
- MR Safe

FLEXLOCK™

Knee & Foot Supports

Reproducible Positioning & Patient Comfort

Provide customizable indexing options for positioning the lower abdomen, pelvis, and lower extremities.

The novel FlexLock Knee Support allows fine superior to inferior adjustments while the patient is in position. It features integrated height adjustability and is easy to clean. The FlexLock Foot Support can be angled to accommodate patient comfort.

Features:

- Ergonomically designed for patient comfort while maintaining reproducible positioning
- Optional clip-on leg and foot straps for added immobilization
- Highly durable and cleanable

Alta

Elevate Your Workflow

Alta is an all-in-one solution that quickly adapts to a wide range of setups, for a more user friendly and ergonomic experience

- Combines functionality of multiple devices
- Dependable and reproducible
- Fast and efficient setups
- Can be extended beyond end of couch top for improved head and neck dosimetry
- Lightweight – 5.4 kg (12 lbs)
- CT, MRI, and treatment compatible

See pages 26-37 for more information.

MR image & Treat

ZiFix is an abdominal/thoracic motion control system that wraps around the patient to provide abdominal compression. It induces shallow breathing, reducing organ motion caused by respiration.

Features:

- Compatible with CT and MRI environments up to 3T
- Suppresses motion of lungs and liver for imaging and radiotherapy
- Provides positional consistency between imaging, simulation, and treatment
- Can be used as a standalone unit or with other products such as DoseMax & VacQfix Cushions

See page 46 for more information.

RT-4558CB02 ZiFix Abdominal/Thoracic Motion Control System

Stabilizes liver and reduces imaging artifacts

ZiFix Traverse attaches to the edges of the device to help immobilize the patient in addition to reducing organ motion.

Benefits:

- Low profile compression for most imaging and treatment systems
- Immobilizes patient during imaging and treatment
- Minimizes potential for collisions and interference when compared to compression bridge

See page 38 for more information.

RT-4558CB03 ZiFix Traverse Abdominal/Thoracic Motion Control System

Encompass™ Coil

RT-5200-01
Encompass 15-Channel
Head Coil

Encompass 15-Channel Head Coil

The adjustable coil geometry locates the coil elements within millimeters of each patient's unique anatomy providing an optimized signal-to-noise ratio and delivering imaging information to support accurate SRS treatment planning when used with the Encompass MR SRS Immobilization System.

MR imaging

Optimized for use with the Encompass MR SRS Immobilization System

The Encompass 15-Channel Head Coil is specially designed to accommodate the high-precision positioning unique to the Encompass MR SRS Immobilization System.

Immobilization in the Encompass SRS System offers motion reduction for increased visualization of fine details, reducing the need for repeated scans. MR images obtained with the Encompass SRS System can be used for SRS treatment planning, including MR-Only and MR Fusion Techniques.

Please note: Encompass Coil is used with the Encompass MR Device for Imaging Only. Encompass Coil is not for Treatment. The Encompass Device can be used for both imaging and treatment.

Encompass™

RT-4600-01-MRI

*Encompass SRS MR
Standalone Device*

Encompass SRS MR Head & Neck Device

The revolutionary Encompass SRS MR Head & Neck Device is an advanced, non-invasive solution that allows for high-precision, submillimetric accuracy and immobilization for stereotactic radiosurgery treatments, including trigeminal neuralgia. The innovative Integrated Shim System provides a 4 mm range of height adjustment utilizing discrete 0.5 mm increments to optimize immobilization. See pages 50-52 for more information.

A direct indexing adapter is required when mounting a standalone device to a treatment couch top. See page 70 for our Direct Indexing adapter options.

Clinical Advantages:

- High precision immobilization with submillimetric accuracy for stereotactic radiosurgery, including trigeminal neuralgia
- Immobilization for treatment of multiple lesions with a single isocenter
- Integrated Shim System optimizes workflow efficiencies
- Open view thermoplastic reduces patient anxiety and allows for intra-fraction positioning verification utilizing optical tracking systems

INSIGHT™ MR Overlay & Coil Holders Package

RT-4700-10
INSIGHT MR Overlay &
Coil Holders Package

**Now Compatible with
Head & Shoulder Mask**

INSIGHT

INSIGHT MR Overlay and Coil Holders are designed to enable MR imaging in the same position as treatment. Its thin design positions the patients closer to the scanner coils for improved MR imaging.

INSIGHT MR OVERLAY

Mounts to compatible Siemens® MAGNETOM™ Aera™, Skyra™, Vida™, and Sola™ tables allowing the use of MR compatible patient positioning devices during MR scanning for radiotherapy. The INSIGHT MR Overlay is compatible with Portrait head only S-frame thermoplastic masks.

INSIGHT MR Coil Holders

Intended to position coils for head and body imaging with the patient in the desired treatment position. Coil holders are available for Siemens® MAGNETOM™ Aera™, Skyra™, Vida™, and Sola™ scanners using the Flex 4, Body 6, and Body 18 coils. Please contact Qfix for more details on compatibility with Siemens® MR Systems.

MR Headframe

RT-4535BOSMRI
BoS MR Headframe

BoS Masks See page 131 for sizes & descriptions.

Specifically designed to meet the unique requirements of proton therapy for patient immobilization and beam transmission. It is engineered to rigidly support the patient without using a flat base that blocks the use of important proton beam angles.

The conformal shape minimizes the distance between the patient and the field defining aperture, optimizing the proton beam penumbra. See page 128 for more information.

SPECIFICATIONS:

Length	1325 mm
Water Equivalence	2.5 mm @ 6 MV
Weight Limit	159 kg (350 lb) Uniformly Distributed Load

Portrait™

MR Intracranial, Head & Neck Device

RT-4552MRI
Portrait MR Intracranial,
Head & Neck Device
compatible with bridges

Provides superior immobilization for a variety of brain, head and neck radiotherapy treatments.

Portrait S-frame thermoplastic masks enable radiotherapy treatment, providing a high level of stability by limiting patient motion and reducing the probability of positioning errors. The MR Safe design enables use with INSIGHT MR Body Coil Holder or other reference bridges in addition to other imaging and treatment modalities. See page 60 for more information.

A direct indexing adapter is required for use when mounting a standalone device to a treatment couch top. See page 70 for our direct indexing adapter options.

Features:

- Easy to use
- Lightweight
- Precise daily reproducibility
- MR Safe

LiquiMark fiducial MRI markers are non-metallic, latex-free, and perform consistently and accurately in a variety of applications.

RT-4421-LM1	8 mm round - for small field of view areas; MR Safe
RT-4421-LM2	15 mm tube - for extremities, soft tissue, and breast; MR Safe
RT-4421-LM3	30 mm tube - for thoracic spines and larger areas of interest; MR Safe
RT-4421-LM4	10 mm square liqui-pouch - for orthopedic imaging and pediatric cases; MR Safe
RT-4421-LM5	10 mm x 24 mm liqui-pouch - for extremities, soft tissue and breast; MR Safe
RT-4421-LM6	10 mm x 38 mm liqui-pouch - for thoracic spines and larger areas of interest; MR Safe

Packaged with 40 markers per box.

MR Safe Locating Bar

RT-4551BRI
MR Safe Locating Bar

MR Safe, two-pin locating bars are used on MR tables and treatment couch tops to index standalone positioning and immobilization accessories. See page 19 for other locating bars.

Polycarbonate Headboard

RT-4548
Polycarbonate Headboard

U-frame Thermoplastic Masks
See page 63 for U-frame options.

Provides a stable platform for head and neck patient positioning using U-frame thermoplastic masks. It has low attenuation and is completely free of metal for enhanced imaging and treatment.

kVue One Proton Couch Top

RT-4551KV-03
kVue One Proton Couch Top

Rigid, lightweight and specifically designed for use with a robotic couch. The expansive array of kVue inserts provide clinicians the flexibility to develop and manage treatments that are best suited for a patient's specific treatment needs. kVue inserts specifically for proton therapy are available.

- Specifically designed to provide range shift confidence for proton therapy
- Interchangeable inserts for full range of proton therapy treatments
- For use with a robotic couch

Typical kVue One Proton Water Equivalence Profile

kVue Proton Couch Top

*The kVue Proton Couch Top is specifically designed for use with robotic couches**

Proton Solutions

* Please call to discuss specific applications.

kVue Portrait Proton Insert

RT-4552KV-01
kVue Portrait Proton Insert

Ideal for typical proton craniospinal radiotherapy treatments such as whole brain lateral fields combined with PA spine fields because the attenuation is constant throughout the device. The kVue Portrait Proton Insert is compatible with S-frame Head Only and Head and Shoulder thermoplastic masks.

BoS[®]

Headframe

RT-4535BOS
BoS Headframe

Specifically designed to meet the unique requirements of proton therapy for patient immobilization and beam transmission. The BoS Headframe is engineered to rigidly support the patient without using a flat base that blocks the use of important proton beam angles.

The conformal shape is desired to minimize the distance between the patient and the field defining aperture, optimizing the proton beam penumbra.

BoS MR Headframe

Enables enhanced imaging in both CT and MR while also facilitating the use of CT fusion techniques. By imaging and treating on the same device, MR image & Treat workflows are made possible.

The conformal shape of the device optimizes the beam proton penumbra and minimizes the blockage of important proton beam angles.

RT-4535BOSMRI
BoS MR Headframe

kVue BoS Insert

Length: 1320 mm

Designed to meet the requirements of proton therapy for patient immobilization and beam transmission. The conformal shape minimizes the distance between the patient and the treatment head, optimizing the beam proton penumbra.

kVue BoS Insert

Length: 1580 mm

This longer version of the kVue BoS insert is required to treat lower spinal fields on tall patients.

BoS Masks
See page 131 for sizes
& descriptions

Head & Neck: **BoS** Masks

The innovative 3D shape matches the contour of the BoS Device, which is designed to meet the unique requirements of proton therapy for patient immobilization and beam transmission. These masks come in a variety of different options, allowing for head and neck as well as head and shoulder immobilization.

Frame Style:

Head & Neck

The Head and Neck BoS masks accommodate a variety of patient sizes, ranging from 240 mm for small patient anatomies to 380 mm for larger patients.

Head & Shoulder

The Head & Shoulder BoS masks allow for immobilization of the shoulders, increasing overall rigidity of the mask. These masks accommodate different patient sizes, ranging from 430 mm for small to average patient anatomies to 480 mm for larger patients.

Key Features:

Assure Open View

Reduces patient anxiety while allowing real time patient monitoring using optical tracking systems.

Cranial Flap

The cranial flap provides an additional point of fixation.

Qfix Gold™ Fiducial Markers

Qfix Gold Fiducial Markers are implantable fiducial markers used to aid in tumor localization. They facilitate localization for External Beam and IMRT. They are optimized for cone beam CT and other kV imaging and mV imaging.

These cylindrical soft tissue markers are made from pure 99.9% gold and are specifically designed to reduce migration. They come sterilized in pre-loaded needles and are packaged with either one or three needles/markers per Tyvek® pouch.

RT-4423K-17-1	Qfix Gold Fiducial Marker, Knurled, 1.2 mm x 1.0 mm, 1 pack in 17 gauge 200 mm needles
RT-4423K-17-3	Qfix Gold Fiducial Marker, Knurled, 1.2 mm x 3.0 mm, 3 pack in 17 gauge 200 mm needles
RT-4423K-18-1	Qfix Gold Fiducial Marker, Knurled, 1.0 mm x 3.0 mm, 1 pack in 18 gauge 200 mm needles
RT-4423K-18-3	Qfix Gold Fiducial Marker, Knurled, 1.0 mm x 3.0 mm, 3 pack in 18 gauge 200 mm needles
RT-4423K-18-5-1	Qfix Gold Fiducial Marker, Knurled, 1.0 mm x 5.0 mm, 1 pack in 18 gauge 200 mm needles
RT-4423K-18-5-3	Qfix Gold Fiducial Marker, Knurled, 1.0 mm x 5.0 mm, 3 pack in 18 gauge 200 mm needles
RT-4423K-18-12-1	Qfix Gold Fiducial Marker, Knurled, 1.0 mm x 3.0 mm, 1 pack in 18 gauge 120 mm needles
RT-4423K-18-12-3	Qfix Gold Fiducial Marker, Knurled, 1.0 mm x 3.0 mm, 3 pack in 18 gauge 120 mm needles
RT-4423K-18-5-SS20	Qfix Gold Fiducial Marker, Coupled, Two, 0.8 mm x 5 mm with 20 mm spacer, 1 pack in 18 gauge 200 mm needle

Distributed by Qfix.

Convenient, easy to use applicator to help regulate the flow of ink.

Available in UV pink or black ink.

Maximizes Patient Safety

Each applicator device contains hypo-allergenic, sterile, non-toxic permanent ink that is safety sealed and gamma-irradiated; assuring sterility.

Differentiates New Areas from Previous Treatment Sites

UV pink ink takes away the daily reminder of radiation. UV pink ink is visible under UV light allowing patients to not have unsightly marking tattoos. UV pink provides an alternative ink color to be used to identify different areas of treatment or differentiate new areas from previous treatment sites. UV pink can be used on all skin tones.

Easy to Use and Repeatable

Qfix InkAlign is a sterile, single-use medical tattooing product with a pen-like design that provides standardized administration of radiation therapy tattooing. The ink applicator comfortably rests in the technician's hand for easy control of ink flow during application to skin.

Qfix InkAlign is available in packs of 25 sterile single use devices with 21 gauge needles in UV pink or black ink. A box of 10 sterile single use black ink droppers is also available (needles not included).

Available for sale in the USA and Canada. Contact Qfix sales for questions about other geographies.

Markers, Accessories & Storage

Suremark Skin Marking & Labeling System

1. Easy-peel tab
2. Lead marker precisely centered on label and affixed with special adhesive
3. Accurate, consistent marker size
4. Medical grade label adhesive will not fall off skin

These nipple markers have a unique adhesive-free center that is designed for pain-free removal from sensitive areas of the skin.

Provide high-quality advanced labeling adhesives that will maintain their application throughout treatment duration. They will consistently provide clear, precise marking in x-ray films.

Comprehensive latex-free compounds are used in Suremark products. Suremark is also the first to offer a full line of environmentally safe, non-metallic markers.

Advanced hospital-grade label adhesives and precise marker placement make this system the only one you will ever want to use in your practice.

Suremark

The most common style for general use. SureMark labels are perfect for distinguishing between a nipple shadow and lesion, thereby reducing costly repeat examinations. Ball sizes available in 1.0 mm, 1.5 mm, 2.0 mm and 2.5 mm.

RT-4421-SL10	with ball size of 1.0 mm
RT-4421-SL15	with ball size of 1.5 mm
RT-4421-SL20	with ball size of 2.0 mm
RT-4421-SL25	with ball size of 2.5 mm

Powermark™

Maintains all of the advantages of regular Suremark labels, with larger lead ball sizes for visibility in radiotherapy. Ball sizes available in 3.0 mm, 4.0 mm, and 5.0 mm.

RT-4421-SL30	with ball size of 3.0 mm
RT-4421-SL40	with ball size of 4.0 mm
RT-4421-SL50	with ball size of 5.0 mm

Suremark Markers

Suremark Wire

Used for marking scar tissue, outlining palpable nodules, moles, and entry points in CT scans.

RT-4421-SLW3	with wire width of 0.3 mm
RT-4421-SLW4	with wire width of 0.4 mm
RT-4421-SLW8	with wire width of 0.8 mm

Visionmark™

These specially formulated non-metallic markers perform consistently and accurately in a variety of applications. An excellent tool for distinguishing between nipple shadow and lesion, the Visionmark reduces the need for repeat examinations.

RT-4421-V20	with ball size of 2.0 mm
RT-4421-V25	with ball size of 2.5 mm
RT-4421-V30	with ball size of 3.0 mm
RT-4421-V40	with ball size of 4.0 mm
RT-4421-V50	with ball size of 5.0 mm

CT Mark and CT Wire Mark

This specially formulated non-metallic material is the result of years of research and development, resulting in a virtually artifact-free opaque marker that is perfect for nearly all CT marking applications.

RT-4421-CT23	with ball size of 2.3 mm
RT-4421-CT40	with ball size of 4.0 mm
RT-4421-CTW10	with 1.0 mm line
RT-4421-CTW20	with 2.0 mm line

Clearline™ Markers

Clearline low-density scar markers provide distinct outlining of scars and other areas of concern without obscuring micro-calcifications in mammography. These markers are non-metallic and are specifically formulated to eliminate scatter in CT applications. Clearline is available in a comprehensive array of sizes to fit all needed applications.

RT-4421-CL10	with semi-lucent lines of 1.0 mm
RT-4421-CL20	with semi-lucent lines of 2.0 mm

PortalMark™ Protective Label

In lieu of permanent or temporary tattoos, apply PortalMark labels to delineate radiation treatment areas. Their premium medical grade adhesive is hypo-allergenic and latex-free, resulting in less irritation for the patient. PortalMark labels are constructed of waterproof, yet breathable material for maximum performance and comfort for up to two weeks. Our unique Suregrip applicator discs ensure easy and accurate placement of PortalMark labels without contaminating the adhesive. Packaged with 110 labels per box.

RT-4421-LM6

LiquiMark fiducial markers are non-metallic, latex-free, and perform consistently and accurately in a variety of applications.

RT-4421-LM1	8 mm round - for small field of view areas; MR Safe
RT-4421-LM2	15 mm tube - for extremities, soft tissue, and breast; MR Safe
RT-4421-LM3	30 mm tube - for thoracic spines and larger areas of interest; MR Safe
RT-4421-LM4	10 mm square liqui-pouch - for orthopedic imaging and pediatric cases; MR Safe
RT-4421-LM5	10 mm x 24 mm liqui-pouch - for extremities, soft tissue and breast; MR Safe
RT-4421-LM6	10 mm x 38 mm liqui-pouch - for thoracic spines and larger areas of interest; MR Safe

Packaged with 40 markers per box.

Suremark™ BeautyLine™ Labels

RT-4421-BL15

The updated design maintains all of the technical advantages of the regular Suremark labels including the tab feature. It is also produced with a soothing artistic flair to help take the edge off of stressful examinations for patients.

RT-4421-BL15	1.5 mm lead ball on BeautyLine Butterfly label (110 per box)

Knee & Foot Supports

Reproducible Positioning & Patient Comfort

Provide customizable indexing options for positioning the lower abdomen, pelvis, and lower extremities.

The novel FlexLock Knee Support allows superior to inferior adjustments and can shift 70 mm in each direction in 35 mm increments while the patient is in position. It features integrated height adjustability and is easy to clean. The FlexLock Foot Support can be angled to accommodate patient comfort.

Features:

- Ergonomically designed for patient comfort while maintaining reproducible positioning
- Optional clip-on leg and foot straps for added immobilization
- Highly durable and cleanable

RapidHeat™ Oven

RapidHeat Hot Air Oven for Aquaplast RT and Fibreplast Thermoplastic Masks, Sheets, Bolus, and Pellets

Quickly reaches working temperatures and provides an easy to use method to heat Aquaplast RT and Fibreplast thermoplastic as well as Aquaplast RT Custom Bolus. Its unique two fan design and optimal spacing between racks allows the hot air to soften the thermoplastic quickly and evenly.

RapidHeat has a large 75 mm high digital display that features a Quick Start Guide to easily navigate operating the oven. The digital temperature controller can be used in a programmable or manual timer mode, increasing work flow efficiencies. The arrows adjust Time/Temperature and the Start/Stop function to easily preheat the oven while prepping the patient.

The digital display includes a timer that counts down from the designated time and alerts the user when ready. The time can be set accordingly for different thermoplastics and Aquaplast RT Custom Bolus.

Additional Features:

- Two fan design for even air circulation
- Minimizes cross contamination
- Non-stick ball-bearing sliding racks for easy cleaning and removal of masks
- Easy to read 75 mm digital display

Outer dimensions: 32 w x 30 d x 19.1" h (inches)
813 w x 762 d x 485 h mm

Internal dimensions: 27 w x 21 d x 10 h (inches)
686 w x 533 d x 254 h mm

RT-2075-110 RapidHeat Oven, 110 Volts

RT-2075-220* RapidHeat Oven, 220 Volts

** Comes standard with European plug.*

Water Bath

The Water Bath accommodates all Qfix and CIVCO RT thermoplastic sizes, with the exception of the Head & Shoulder Integrated Shim™ S-frame masks.

MTRH1500	Water Bath, 110 Volts
MTRH1500EX	Water Bath, 230 Volts
MTCBPLLG	Pan Liner, Large, Qty 2

Dimensions: (W x D x H)*
 Overall: 79.37 cm x 60.96 cm x 33.02 cm (31.25" x 24" x 13")
 Internal: 63.5 cm x 48.3 cm x 12.7 cm (25" x 19" 5")

Water Bath Cart

The Water Bath Cart provides an easy, efficient way to transfer a water bath or Rapid Heat Oven between treatment rooms. Load capacity of 500 lbs (227 kg).

 ArmShuttle Post with Indexing Scale, 1 Post

RT-4543S
 Silverman Adapter for ArmShuttle Elite

Ergonomically designed for patient comfort and support. Multiple headrest positions allow for additional head and positioning flexibility. It is MRSafe, CT compatible, and indexable to ensure repeatable positioning between modalities.

Bolx I® & Bolx II®

Now with CE Mark

Bolx I and Bolx II are flexible, tissue-equivalent build-up materials, designed to increase surface dose. Both Bolx I and Bolx II sheets are made of a cured transparent gel (with or without a polyethylene skin), and offer excellent conformity to body contours. Bolx I is encased in a layer of polyethylene skin that makes it more durable. Softer, skinless Bolx II is better for stacking. It is self-adhering and stays in place and conforms better to irregular body surfaces. Both are easy to clean with water or alcohol. Bolx II is intended for single patient use.

RT-31051	Bolx I Gel Bolus with film, 150 mm x 150 mm x 5 mm
RT-31101	Bolx I Gel Bolus with film, 150 mm x 150 mm x 10 mm
RT-31033030	Bolx I Gel Bolus with film, 300 mm x 300 mm x 3 mm
RT-31052	Bolx I Gel Bolus with film, 300 mm x 300 mm x 5 mm
RT-31102	Bolx I Gel Bolus with film, 300 mm x 300 mm x 10 mm
RT-31152	Bolx I Gel Bolus with film, 300 mm x 300 mm x 15 mm
RT-31202	Bolx I Gel Bolus with film, 300 mm x 300 mm x 20 mm
RT-31302	Bolx I Gel Bolus with film, 300 mm x 300 mm x 30 mm
RT-32052	Bolx II Gel Bolus w/out film, 300 mm x 300 mm x 5 mm

Superflab Bolus

RT-8117-3030-3	Superflab Bolus, 300 mm x 300 mm x 3 mm
RT-8117-3030-5	Superflab Bolus, 300 mm x 300 mm x 5 mm
RT-8117-3030-10	Superflab Bolus, 300 mm x 300 mm x 10 mm

*Superflab Bolus is available in a wide variety of additional sizes.
Distributed by Qfix. Not available in all markets.*

Tissue-equivalent bolus that is flexible and will not dry out. The slabs conform to the patient's contour, while still maintaining uniformity in thickness. Superflab comes in different thicknesses to provide maximum dose buildup for relevant photon energies.

Aquaplast RT Custom Bolus & Adapt-It Thermoplastic Pellets

Aquaplast RT Custom Bolus formed on a patient

Aquaplast RT Custom Bolus and Adapt-It Thermoplastic Pellets

Used for hard-to-bolus areas such as: chest wall, nose, parotid, groin, ears, and any irregularly surfaced anatomical feature. The attenuation characteristics are comparable to other polymer-based products; however, its conformability to the anatomy is superior to other bolus products. Both products soften in hot water or RapidHeat Oven. It reduces setup time and minimizes air gaps and day-to-day variability.

RT-1910-4	Aquaplast RT Custom Bolus, 4.8 mm, 200 mm x 230 mm
RT-1913-2	Aquaplast RT Custom Bolus, 2.4 mm, 300 mm x 300 mm
RT-1913-3	Aquaplast RT Custom Bolus, 3.2 mm, 300 mm x 300 mm
RT-1913-4	Aquaplast RT Custom Bolus, 4.8 mm, 300 mm x 300 mm
RT-1922	Aquaplast RT Custom Bolus, 4.8 mm, 450 mm x 600 mm
RT-1931-4	Aquaplast RT Custom Bolus, 4.8 mm, 300 mm x 450 mm

** Bolus materials are available in a wide variety of additional sizes and thicknesses.*

AirDrive™

Lithotomy

Alta

Slate

BoS

Caddie

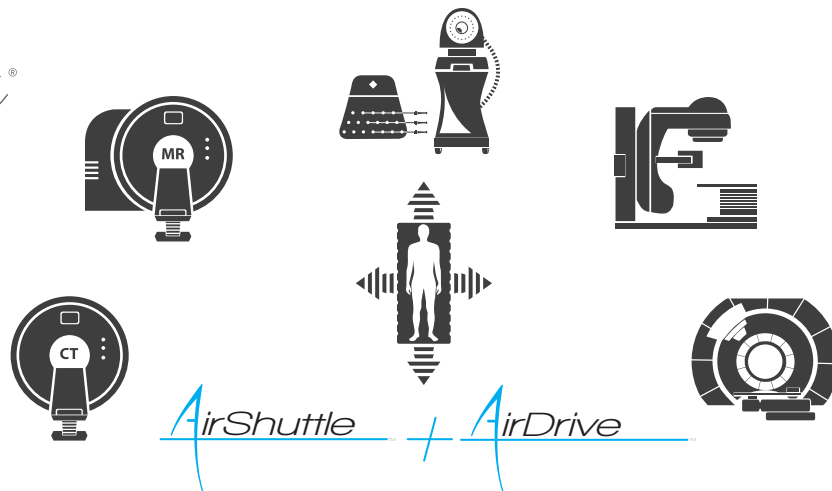

Trolley

Symphony[®]

Position your patient once and go from one modality to the next without having to perform additional setups.

A Symphony solution combines an AirShuttle positioning & transfer device with an AirDrive system to provide smooth patient transfers for imaging and treatment applications. AirShuttles and AirDrives can be used in imaging modalities including CT, X-Ray, ultrasound, fluoroscopy, MRI (up to 3 Tesla), and radiation therapy treatment environments including brachytherapy.

- Safely transfer your patient with minimal clinical staff
- Transfer on and off a wide variety of surfaces including sheet-covered pads and mattresses
- Patient positioning can include immobilization, where required
- Suitable for use in MRI

AirShuttle[™]

Positioning & transfer devices are available for numerous therapeutic applications and are compatible with a wide variety of existing patient positioning and immobilization accessories (when required). Low attenuation and excellent homogeneity result in superior imaging, simulation, and treatment.

Brachytherapy and Lithotomy

Lithotomy solution accommodates blade mounted stirrups for improved treatment site access

External Beam: Photon and Proton

Alta is a feature-rich, all-in-one solution that adapts to a variety of clinical setups on a single device

Slate offers a customizable platform for your imaging and treatment needs

BoS positions your patient for head and neck imaging and proton treatment

AirDrive[™]

Systems provide ample power to transport and transfer patients in a variety of clinical settings, even for the busiest centers. The robust transfer technology enables patient transfer, even over gaps and uneven surfaces.

AirDrive Caddie provides optimum transfer performance in a small package. It can be used with most commercially available trolleys and stretchers.

AirDrive Trolley is specially designed to transport and transfer your patients for a variety of workflows. It can also be used as a procedural table and as a recovery bed.

Lithotomy *AirShuttle*

Maximize Workflow Flexibility

The patient is positioned once on the Lithotomy AirShuttle prior to insertion and then transferred easily, safely, and stably for imaging, treatment, and recovery.

Simplified Workflow & Improved Experience

- Integrated surgical rails are compatible with CT and MR imaging and allow stirrups, steppers, and other accessories to be quickly attached
- The leg extension supports the patient's legs for transfers and imaging and is easily removed to provide access to the perineum
- Provides stable patient support and reduced patient motion during transfers
- Clinicians report reduced applicator motion and improved patient comfort when using AirDrive technology over conventional patient transfers
- Patient transfers are performed with only two people, reducing staffing needs and allowing team members to focus on other responsibilities
- Removable, cleanable pads on the transfer device provide patient comfort from insertion through treatment

Lithotomy AirShuttle with AirDrive Caddie

Lithotomy AirShuttle with AirDrive Trolley

MR & CT Images Using Lithotomy AirShuttle

Low-artifact MR images.

Low-artifact CT images.

Typical Brachytherapy Workflow

Insert

The patient is prepped for insertion directly on the Lithotomy AirShuttle. Once the patient is positioned in the stirrups, the leg extension is removed to gain access to patient anatomy. After insertion, patient can be easily transferred and transported with an AirDrive system.

Image

AirShuttle devices and AirDrive systems are compatible with MR, CT, and other X-ray environments. The patient is imaged directly on the Lithotomy AirShuttle.

Transfer

The AirDrive system safely transfers patients without repositioning. Patient stability and smooth transfer minimize movement of soft tissue and applicators.

Treat

The patient is then treated on the Lithotomy AirShuttle, which has been the transfer platform during the entire workflow.

Insertion on the Trolley

To streamline your workflow even further, insertion can be performed directly on the trolley. After setup, simply transfer the patient to the end of the trolley, stopping at the green indicator on the Insertion Overlay. Insertion can then be performed from this position on the trolley.

Green Indicator

Transferred to end of trolley

Ready for Insertion

Quickly Adapts to a Variety of Clinical Treatments

Thermoplastic Material

For over 40 years, we've manufactured our own thermoplastics.

This guarantees the highest levels of process control ensuring that our customers receive the most reliable products.

Aquaplast RT™

We are the **inventors of Aquaplast RT**. Its rigidity, **resistance to shrinkage**, and easy molding qualities are unparalleled in the industry.

Aquaplast RT is available in the following thicknesses and perforation patterns:

Fibreplast®

Our premium proprietary thermoplastic, which combines Aquaplast RT with high strength Kevlar®. Fibreplast is **50% more rigid** than standard thermoplastics and shrinks less.

Fibreplast is available in the following thicknesses and perforation patterns:

SRS: Encompass

Revolutionary Patient Immobilization

Encompass SRS Fibreplast mask systems are made from the most rigid thermoplastic available and include Integrated Shim, providing submillimetric immobilization.

Clinical Advantages:

- High precision immobilization with submillimeter accuracy for stereotactic radiosurgery, including trigeminal neuralgia
- Immobilization for treatment of multiple lesions with a single isocenter
- Integrated Shim optimizes workflow efficiencies
- Open view thermoplastic reduces patient anxiety and allows for intra-fraction positioning verification utilizing optical tracking systems
- Better workflow and instant setup feedback

With Integrated Shim you can tighten or loosen the mask in 0.5 mm increments while the patient is wearing the mask

Key Additional Features:

Assure™ Open View

Reduces patient anxiety while allowing real time patient monitoring using optical tracking systems.

Variable Perf™ Pattern

The perforation pattern maximizes rigidity while minimizing the bolus effect.

Portrait with Integrated Shim

Innovative Integrated Shim allows independent height adjustment at each pin, providing completely customizable immobilization. Each Integrated Shim can be adjusted in discrete 0.5 mm increments, with a total range of 4.0 mm.

Key Features:

- Independent shimming at each pin point
- No need to remove mask to tighten or loosen
- Increased workflow efficiencies
- Increased patient comfort
- Instant setup feedback

With Integrated Shim you can tighten or loosen the mask in 0.5 mm increments while the patient is wearing the mask

To adjust shim height:

- Pull up to unlock the pin
- Rotate the pin to the desired height adjustment
- Depress the pin to lock

IntegraBite™

Key Features:

- Decrease head and neck rotation, flexion, and extension
- Repeatable positioning
- Simple, streamlined design makes application and insertion easy

Head & Neck: S-frames

Portrait[™]

The Portrait S-frame series of masks is compatible with the Portrait device and other S-frame devices. These masks come in a variety of different options allowing for shoulder immobilization, accommodation of long hair, and decreased anxiety. They are available in Aquaplast RT and Fibreplast material in 2.4 mm and 3.2 mm thicknesses.

Frame Styles:

Head Only

The Head Only masks are ideal for a variety of treatments from whole brain to complex IMRT treatments.

Split-frames

Split-frames reduce the stretching required of the thermoplastic, thus forming a more rigid mask. These masks also accommodate patients with long hair.

Head & Shoulders

The Head & Shoulder masks extend below the patient's shoulders, providing additional immobilization.

Key Features:

Assure Open View

Reduces patient anxiety while allowing real time patient monitoring using optical tracking systems.

Open Eye Open Mouth

Eye openings help reduce anxiety while capturing bridge of nose. Mouth opening allows for tongue displacement and free breathing.

Variable Perf Pattern

The optimal perforation pattern maximizes rigidity while minimizing the bolus effect.

Head & Neck: U-frames

The U-frame series of masks is compatible with the AccuFix Device and other U-frame devices. These masks come in a variety of options allowing for different patient head sizes, accommodating long hair, and decreasing anxiety. They are available in Aquaplast RT and Fibreplast material in 2.4 mm, 3.2 mm, and 4.8 mm thicknesses.

Frame Style:

Traditional U-frames

Traditional U-frame masks are available in Head Only to provide a variety of patient positioning and immobilization solutions. These masks are especially useful for patients with smaller heads.

Slimline U-frames

Slimline U-frame masks feature a thin frame that maximizes the usable area of the thermoplastic material. These masks are especially useful for patients with larger heads.

Split U-frames

Split-frames reduce the stretching required of the thermoplastic, thus forming a more rigid mask. These masks also accommodate patients who have long hair.

Key Features:

Assure Open View

Reduces patient anxiety while allowing real time patient monitoring using optical tracking systems.

Open Eye Open Mouth

Eye openings help reduce anxiety while capturing bridge of nose. Mouth opening allows for tongue displacement and free breathing.

Proton: BoS

BoS[®] Headframe

The innovative 3D shape matches the contour of the BoS Device, which is designed to meet the unique requirements of proton therapy for patient immobilization and beam transmission. These masks come in a variety of different options, allowing for head and neck as well as head and shoulder immobilization.

Frame Style:

Head & Neck

The Head and Neck BoS masks accommodate a variety of patient sizes, ranging from 240 mm for small patient anatomies to 380 mm for larger patients.

Head & Shoulder

The Head & Shoulder BoS masks allow for immobilization of the shoulders, increasing overall rigidity of the mask. These masks accommodate different patient sizes, ranging from 430 mm for small to average patient anatomies to 480 mm for larger patients.

Key Features:

Assure Open View

Reduces patient anxiety while allowing real time patient monitoring using optical tracking systems.

Cranial Flap

The cranial flap provides an additional point of fixation.

Head & Neck: Push-Pin Style 3-Point & 5-Point Masks

These masks allow for 3-point and 5-point immobilization utilizing a simple push pin design integrated into the masks. These masks are also available as reloadable inserts without a frame. They are available in Aquaplast RT and Fibreplast material, each with a nose hole for free breathing.

Frame Style:

Disposable

The 3-point (head and neck) and 5-point (head & shoulders) disposable PentaFix masks provide immobilization with a built in frame.

Reloadable

The reloadable masks provide an economical and eco-friendly option by using a reusable frame.

Key Features:

Assure Open View

Reduces patient anxiety while allowing real time patient monitoring using optical tracking systems.

3-Point Masks with Disposable Lockers

RT-1778KPR3DF	Fibreplast 3-Point Mask, Micro Perf, Assure Open View, 2.4 mm
RT-1782KPR3D	Fibreplast 3-Point Mask, Standard Perf, 2.4 mm
RT-1778KPR3D	Fibreplast 3-Point Mask, Micro Perf, 2.4 mm
RT-1782PR3D	Aquaplast RT 3-Point Mask, Standard Perf, 2.4 mm
RT-1778PR3D	Aquaplast RT 3-Point Mask, Micro Perf, 2.4 mm

5-Point Masks with Disposable Lockers

RT-1778KPR5DF	Fibreplast 5-Point Mask, Micro Perf, Assure Open View, 2.4 mm
RT-1782KPR5D	Fibreplast 5-Point Mask, Standard Perf, 2.4 mm
RT-1778KPR5D	Fibreplast 5-Point Mask, Micro Perf, 2.4 mm
RT-1782PR5D	Aquaplast RT 5-Point Mask, Standard Perf, 2.4 mm
RT-1778PR5D	Aquaplast RT 5-Point Mask, Micro Perf, 2.4 mm

3-Point, 4-Point & 5-Point Masks

RT-1782PR3	Aquaplast RT 3-Point Mask, Standard Perf, 2.4 mm
RT-1778PR3	Aquaplast RT 3-Point Mask, Micro Perf, 2.4 mm
RT-1782PR4	Aquaplast RT 4-Point Mask, Standard Perf, 2.4 mm
RT-1782PR5	Aquaplast RT 5-Point Mask, Standard Perf, 2.4 mm
RT-1778PR5	Aquaplast RT 5-Point Mask, Micro Perf, 2.4 mm

Head & Neck: 3-Point & 5-Point L-Profile Masks

The L-Profile series of masks is compatible with L-Profile type devices. These masks allow for 3-point and 5-point immobilization utilizing a L-Profile design which locks into the device via the L design. They are available in Aquaplast RT and Fibreplast material in 2.4 mm and 3.2 mm thicknesses.

Frame Style:

Head & Neck

The 3-point mask are ideal for everything from whole brain to complex IMRT treatments.

Head & Shoulder

The 4-point and 5-point masks extend below the patient's shoulder, providing additional immobilization.

Key Features:

Assure Open View

Reduces patient anxiety while allowing real time patient monitoring using optical tracking systems.

3-Point Masks

RT-1778KFORF3	Fibreplast 3-Point Mask, Micro Perf, 2.4 mm
RT-1876KFORF3	Fibreplast 3-Point Mask, Micro Perf, 3.2 mm

RT-1778ORF5	Aquaplast RT 5-Point Mask, Micro Perf, 2.4 mm

Pelvis & Thoracic Thermoplastics: Alta Multipurpose Device

Alta allows for positioning and immobilization of patients for pelvic and thoracic applications through the use of thorax and pelvis thermoplastics and other pelvic positioning products.

RT-4800-GL
Alta Groin Lock

RT-4800-01
Alta Multipurpose Device

Pelvis Thermoplastics: Qfix Carbon Fiber Pelvis System

The pelvis thermoplastic series is compatible with the Qfix Carbon Fiber Pelvis System and immobilizes the pelvis region. The system flattens the lower lumbar for added comfort and repeatability.

RT-4526S
Qfix Carbon Fiber Pelvis System

The Aqua-Brief technique uses a sheet of Aquaplast RT and a three-point fixation system covering the pelvic region and not the abdomen. The Groin Lock Key provides a secure, indexable patient fixation.

Opti-Handles

For use with Alta Multipurpose Device

RT-4800-H30	Opti-Handles, 300 mm (12 in.)
RT-4458-H45	Opti-Handles, 450 mm (18 in.)

For use with Qfix Carbon Fiber Pelvis System

Aquaplast RT™ Cosmas Cup™ Brassiere

Provides lift to the patient's breast and helps eliminate unwanted folds during radiotherapy treatment. Developed in collaboration with therapist Dawn Cosmas, it helps minimize tissue breakdown under the breast.

- Precuts have a consistent perforation pattern to maximize skin sparing
- Heated and custom formed around the patient's breast
- Securable after molding to ensure reproducibility

RT-1597B	Cosmas Cup - Size B, 50 mm x 220 mm
RT-1597C	Cosmas Cup - Size C, 80 mm x 250 mm
RT-1597D	Cosmas Cup - Size D, 100 mm x 280 mm
RT-1597E	Cosmas Cup - Size E, 150 mm x 300 mm

*Aquaplast RT Cosmas Cup
(Available in 4 sizes)*

Easy and precise positioning to ensure reproducibility.

Thermoplastic Chin Strap

Designed to be used with the Portrait Head Only Adapter (RT-4546-03) for Supine Breast Devices to keep the chin out of the treatment field.
